CONTRACT WTC-221.00
WORLD TRADE CENTER
THE PORT OF NEW YORK AUTHORITY
LACLEDE CONTRACT 67-J-31801

Attached find the following drawings:

Drawing No.	Title	Date
F3-r-302	Special Angle Types 15, 16 & 17	R2-24-68
F3-r-305	Special Angle Type 30	R2-24-68
F3-r-307	Steel Truss Bar Sections	2-24-68
F3-r-308	Laclede Angles - Unequal Legs Properties for Designing	1-24-68

Please destroy the superceded standards previously distributed and listed below:

Drawing No.	Title	Date
F3-r-302	Special Angle Types 15, 16 & 17	R1-15-68
F3-r-305	Special Angle Type 30	R1-15-68

These two drawings were distributed with Memorandum #4 dated January 16, 1968.

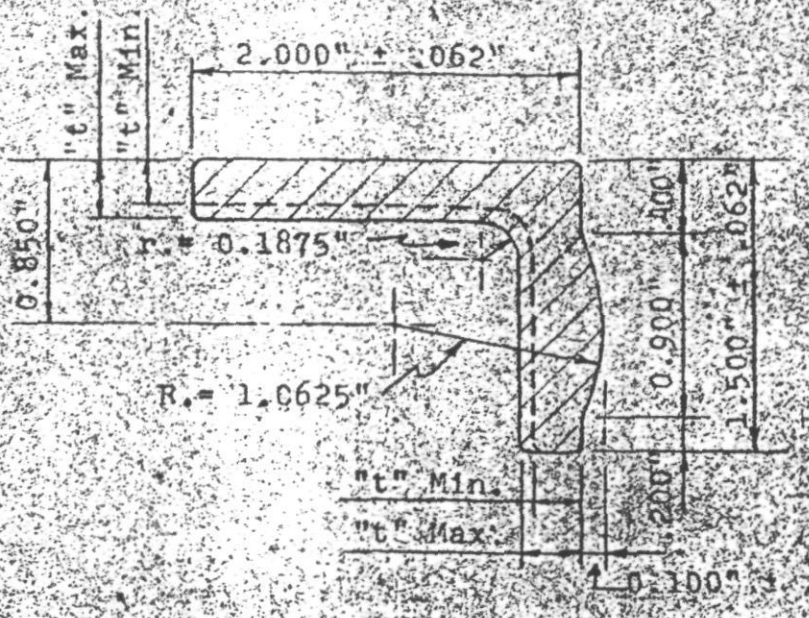
The following changes have been made on the drawings:

F3-r-302 was changed to show a new angle type 17 which is a 2" x 1-1/2" x .370 Angle.
F3-4-305 was revised to change the tolerance shown on the 3" leg.

Drawing F3-r-307 covers all the Plain Round Bars that will be required on the project. Please note the 1-13/16" Plain Round Bar which has not been previously discussed. Will there be any problem rolling this bar if commercial tolerances and straightness are not important?

Drawing F3-4-308 shows the design properties of all bulb-legged angles used on the project.

2002-NOV-20



HOT ROLLED BULB ANGLE

Designation	Angle Size (Inches)	Thickness "t" (Inches)	Weight (Lbs/Ft)	Area (Sq. Ins.)
15	2 x 1½	.250 ± .012	2.99	0.881
16	2 x 1½	.310 ± .012	3.59	1.057
17	2 x 1½	.370 ± .012	4.17	1.226

SPECIFICATIONS

Tolerance - 2-1/2% by weight
Grade - A-242 50,000 psi minimum yield strength
Chemistry - Carbon .22 Maximum
Manganese 1.00 Maximum
Squareness of Legs - 90° ±1-1/2°
